

Complete Switch Machine Layout Packages

Description:

G&B Specialties provides everything from a single connecting rod to a full switch rodding package for power switches (single point, double slip, moveable point frogs, swing nose frogs, and derails), helper rod assemblies (push-pull and rotary), and hand throws (electric lock and switch circuit controller.)

Features:

- **Operating, lock rod connecting, point detector connecting, front rods, point lugs, tie straps, junction box, conduit and fittings, and mounting hardware included.**
- **All rods are forged to comply with AREMA standards.**
- **Internal components, couplings, and drop lugs are also available.**
- **Can be applicable to all switch machines. (Alstom 5 Letter Machine, Ansaldo Model M-3/M-23, T-20/21, etc.)**
- **Narrow, Standard, and Wide Gage Applications.**
- **Contact our in house engineering staff to design the layouts to meet your railroad needs.**
- **Wood Tie, Concrete Tie, and Direct Fixation Applications.**
