MPI Rebuild/Repower/Overhaul

MotivePower Inc. (MPI), a Wabtec company, specializes in reworking old and worn-out equipment into like new locomotives complete with material and workmanship warranty and value added options. With a broad range of solutions, MPI has the capability to rebuild in-kind, upgrade emissions by adding an MPI developed and tested emission kit or repowering with a more fuel efficient and lower emissions engine. With a proven track record and broad expert technical density, we

work closely with our customers to provide long-term solutions to achieve the highest levels of safety, performance, operating efficiency and reliability.

MPI has reworked locomotives for a variety of customers, over a wide selection of models and for all locomotive markets.

HEP replacement
